

## TEXTRON Fastening Systems

## S P E C I F I C A T I O N S

### PanelMate® Plus Fasteners

external threads  
accept 1/4-20  
wing nuts

#### Features

- One-piece cold-formed durability
- Special notched thread design provides full thread engagement
- In concrete, just drill and drive – in wood, no pre-drilling is required
- Galvanic compatibility with dissimilar metals
- Corrosion-resistant finish
- Once in place, PanelMate® anchors await quick and easy attachment of storm panels with standard 1/4 - 20 wing nuts

#### Benefits

- Eliminates expensive, unsightly and labor-intensive installations of aluminum headers, sills, mounting channels, angle brackets and machine screw anchors
- A fraction of the installed cost of other, more-complicated panel anchoring systems
- Can be adjusted easily

### PanelMate Plus Fasteners

#### Application:

Storm panels to concrete or wood structurals, including stucco-faced buildings

#### Specification:

Stem fastener with one end tapped to accept 1/4-20 hardware, that meets Miami-Dade County Hurricane Standards PA201-94, PA202-94 and PA203-94 when used with approved systems

#### Approvals/Listings:

When used with approved systems, PanelMate Plus fasteners meet Miami-Dade County Hurricane Standards:

- PA201-94 Impact
- PA202-94 Uniform Static Air Pressure
- PA203-94 Cyclic Wind Loading

#### Diameter:

#14-10

#### Length:

5/8" (stud)

2-1/4" (fastener)

#### Head Style:

Hex

#### Thread Forms:

One end notched; other threaded to accept standard 1/4-20 nuts

#### Materials:

Low carbon steel and stainless steel

#### Finish:

Silver Stalgard® corrosion-resistant finish

#### Installation Tools:

Drilling: Standard drill tool equipped with tanged drill bit adaptor NY145/tanged carbide-tipped drill bit or 7" SDS carbide-tipped drill bit

Seating: Standard drill tool equipped with PanelMate drive sleeve NY140 or drive tool equipped with 3/16" modified drive tool NY150
